

2. Campbell Hausfeld WS099001AV – Most Portable Welder Arc Stick Welder

The Campbell Hausfeld WS099001AV is **the next best welder** for beginners in this review, and for a good reason! Reviewers have commented about how they were able to use the welder with zero to little training.

What was the previous welder?

Weldpro 200 Amp Inverter

Set up is a breeze; take **it** out of the package and plug **it** in. When we tested **it**, we noticed the ease of use as well. **It** is a capable little welder that is great for hobby welders and **DIY** enthusiasts.

Set up is a breeze: set up is easy

What do all the ‘it’s refer to? Campbell Hausfeld Arc Stick welder

DIY : Do It Yourself

enthusiast : private users, fans

The design is compact and **lightweight**. It weighs 8 ounces; thus, so you can carry it easily from one place to another. The handle on the welder offers a good grip and is very comfortable for welding.

lightweight: it has a light weight

you can carry it easily from one place to another: it is portable welder

1 ounce: 28.35 gr

thus: as a result

The **rods** that come with the Campbell Hausfeld WS099001AV work really well. While using the welder, we particularly enjoyed the quality of **jobs** we got from using them.

rods: sticks

jobs: welds

The welding kit comes with a helmet. **Although** it is cool, we couldn't get any welding done with them. With **this** in mind, I suggest you **invest** in a different helmet. We got an **auto-darkening helmet**, and it enhanced the entire welding experience.

Although: even if

this : we couldn't get any welding done

to invest : to buy

auto-darkening helmet : helmet which stops the harmful light automatically

The Campbell Hausfeld WS099001AV draws just 15 Amps - 20 Amps; therefore, you can use it on a small power source. Furthermore, it has a 20% duty cycle at 50 Amps. While this isn't groundbreaking, it is a nice feature for a welder at this price.

draws: uses

therefore: for this reason

Furthermore: also

is groundbreaking : revolutionnary

Another feature the Campbell Hausfeld WS099001AV has is the dual heat setting. With this feature, you can use the welder for your minor repairs and small projects.

dual heat setting: two heat setting positions

this feature: two heat setting positions

To protect you and to enhance durability, this welder comes with a thermal overload protection system. Thus when it gets too hot, it cuts out the power. Click here to see the best price.

thermal overload protection system: protection against over thermal load

Thus: consquently

Features

20% AT 50A duty cycle

Runs on 115 V power

Thermal overload protection

Pros : advantages

Portable and compact

design Lightweight

Overload protection is a great

feature Easy to set up

Cons : disadvantages

The cord is short

Clamp construction is rather weak
