

Writing task.

Reorder the following sentences to get a meaningful paragraph.

- Generally, as the temperature rises, matter moves to a more active state.
- There are four main states of matter: solids, liquids, gases and plasmas.
- One example of those forces is **temperature**.
- The phase or state of matter can change when the temperature changes.
- Elements and compounds can move from one phase to another phase when special physical forces are present.
- Each of these states is also known as a phase.
