AD/CE

Module of: **English Language**

Teacher: AbdelMadjid Ben Habib

- How do Piaget's and Vygotsky's theories differ? 4 points

Piaget's theory emphasizes epistemic constructivism, focusing on how individuals actively construct knowledge through interaction with their environment. In contrast, Vygotsky's theory emphasizes social constructivism, highlighting the role of social interaction and psychological tools in cognitive development

- Is the following statement true or false? [Answer: false] The answer is only "true" or "false." (4)

Gestalt theory focuses on the perception of isolated elements rather than whole forms

- Select one or more correct answer/s and circle it/them: (4) The answer is invalidated when combining true and false.

Vygotsky's theory deals with :

The unconscious

Vygotsky

Constructivism

Social interaction

- Correct the following statement: (4): Piaget focuses on the interaction between assimilation and cognitive development

Correct: Piaget focuses on the interaction between assimilation and accommodation

- Corresponding Questions: Link or associate with an arrow each item on the left with the corresponding item on the right (4):

Gestalt psychology focuses on → contextual perception

Piaget's theory focuses on → egocentrism

Vygotsky's theory focuses on → instruction ↔ learning

ZPD focuses on → psychological support

Note: Please write your card number and name in Arabic/English. Do not use erasers or correction fluid

May Allah helps you ☺ بتوفيق الله
