## **1. Module Description**

### **Information and Communication Technologies (ICT)**

*The Information and Communication Technologies (ICT) module* aims to introduce Master 2 students (Semester 1) to the fundamental concepts, tools, and applications of digital technologies in the field of communication and media. This module explores the impact of technological developments on information production, dissemination, and reception in contemporary societies. It also highlights the role of ICT in education, academic research, professional communication, and digital media, while addressing current challenges and future trends.
